

Innovative learning space designs that facilitate the widest array of flexibility in teaching, learning, and social educational activity.

High quality teaching of literacy and numeracy skills

Students who can connect, communicate and engage in self-directed learning

Franklin
School

What might you see in today's learning environment?

Teaching and learning practices that develop in students the learning skills of creativity, collaboration, communication, and critical thinking

Students who belong to the classroom (not a desk) and can move to the area that best suits his/her accomplishing the required learning

Technology enhanced spaces

Activities that prepare children for a complex and constantly changing future

Flexible learning areas that allow students to be grouped according to need, encourage students to learn collaboratively and cooperatively, and enable individual personalised learning when required

Spaces that provide capacity for multiple uses, flexibility and change of use over time
